

# AAAB

## Kawasaki KX80 Rear Wheel Spacer

### Notes:

There are three holes for showing the wear of the part. It is recommended to check the marks from time to time to see if they are still visible. If they are not, it is recommended to change out the part for a new one. The 0.2 mm hole shows for minor wear, the 0.5 mm hole shows for moderate wear, and the 1 mm hole indicates major wear. It is also recommended to grease the part thoroughly. The part is designed and manufactured by AAAB.
